## **DETAILED ACTION**

### ***Continued Examination under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/10/2007 has been entered.

### ***Allowable Subject Matter***

**Claims 31 - 50** are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Consider independent **claims 31, 38, 43, and 48**, the best prior art found during the examination of the present application are Khullar (USPN 7,023,824) and Wentink (USPN 2005/0030976).

In view of the present application, Khullar discloses adjusting data rate and transmission power of a transceiver and maintaining a given quality of service by measuring the link margin of the received signal. Khullar further discloses setting data rates according to a measured link margin.

However, compared to the present application, Khullar fails to disclose third determining whether an acknowledgement signal has been received from said remote wireless entity in response to said transmitted signal; and when an acknowledgement signal has been received in response to said transmitted signal, repeating reducing,

transmitting, and third determining until an acknowledgement signal is not received in response to a transmitted signal.

In view of the present application, Wentink discloses calculating the link margin and adjusting the transmit power. In addition, using the ACK or acknowledgement signal to deliver link margin information.

Nevertheless, compared to the present application, Wentink fails to disclose when an acknowledgement signal has been received in response to said transmitted signal, repeating reducing, transmitting, and third determining until an acknowledgement signal is not received in response to a transmitted signal.

In light of the above cited and other examiner cited references, the present application and invention is novel and non-obvious since the cited prior arts of record do not contain either explicitly or implicitly the limitations as disclosed in independent claims 31, 38, 43, and 48. In addition, any reasonable combination of the cited references cannot be used to reconstruct the claimed invention. Therefore, the present application as disclosed is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
